

DRAFT OSB WOOD LEGISLATION

SECTION 1: DEFINITIONS

- (a.) "Class A fuel materials" is defined as wood, straw, and paper products.
- (b.) "Fire training activities" means any type of live fire training exercise or demonstration.
- (c.) "Oriented strand board" means any wood products containing poly-methylene diphenyl diisocyanate, which release toxic byproducts when ignited.

SECTION 2: PROHIBITION ON USE

- (a.) In the state of [STATE], no individual, local or municipal government, governmental agency, fire district, regional fire protection agency, or other entity that provides firefighting services, or any program of instruction or training, shall use Class A fuel materials that contain oriented strand board during fire training activities.

SECTION 3: EFFECTIVE DATE

- (a.) Be it further enacted that this Act shall take effect on [DATE]
