LIFE SAFETY & FIRE INSPECTION RECOMMENDATIONS

College Classroom & Lecture Buildings

NOTE: The information contained below are recommendations to ensure life and fire safety in the event of an emergency and not actual International Fire Code (IFC) requirements.

- Ensure employees know how to evacuate from work areas and perform any assigned duties in an emergency.
- Employees should know location of nearest means to activate fire alarm system and extinguisher.
- In the event of a fire, occupants should only fight the fire IF:
 - Fire is not spreading rapidly
 - Fire is not blocking means of escape
 - Occupants are trained to use equipment needed to fight fire

If none of the above are possible, leave the area IMMEDIATELY

- Post evacuation routes in each classroom/lecture hall/auditorium located near exit doors
- If chemicals or hazardous materials are required, order and store the minimum amount required for teaching, instruction or use.
- Survey chemicals or hazardous materials at least annually and properly discard any that are expired or show signs of decomposition.
- Regularly clean lint traps on dryers and filters on vents, fans, air conditioners or other mechanical equipment
- Clean up spills of flammable liquids or other hazardous materials quickly and safely
- Keep announcements, decorations or other paperwork to a minimum (maximum of 20 percent of wall area preferably) and fasten all corners to bulletin boards.
