Dr. Adrienne Kramer

Dr. Adrienne Kramer has been a GIS analyst in the Department of Fire and EMS Operations/GIS for more than three years. She is responsible for identifying data and software required to provide the best products for IAFF members. Kramer provides technical writing expertise garnered from years of writing on the science of disasters for scientific journals and academic conferences. She has served on the GIS Disaster Response Team and heads the GIS portion of the IAFF COVID-19 response efforts. Kramer was also integral in the creation of the Disaster Assistance Response Tool (DART) for field efforts. Prior to joining the IAFF, Kramer was a GIS Unit lead and emergency management specialist at the Federal Emergency Management Agency (FEMA), where she built GIS tools for disaster response and analyzed program effectiveness. She earned her PhD in geography focusing on climatology and emergency management from Penn State University. She also earned her Master of Science in geography from Penn State and her Bachelor of Arts in geography, math and Spanish from the State University of New York, Geneseo.
